

Application - Step 3

Choose the programme you are interested in and view the admission requirements before applying. Note that some programmes have been greyed out as applicants need to meet additional criteria or have a professional qualification. Example: Must be full-time employed, must have a teaching qualification, must be registered with a professional body, etc.

Applicants wishing to apply for these programmes need to follow the [manual application process](#) or contact [admissions](#)

NB: Information for previously registered students wanting to reapply to complete a qualification that they were originally registered for

Some programmes have been or may be in the process of being phased out. If you do not find the programme you were previously registered for, consult the faculty [prospectus](#) to establish if it is still offered. Once you have established that the programme is still offered, complete a manual form by either downloading the [application form](#) or contact [admissions](#) to forward you the necessary forms.
